Hal yang sering dialami dari seorang yang ingin belajar komputer adalah ketika mendapat trauble erorr saat menjalankan komputer. Kali ini saya akan membantu teman -teman bagaimana menyelesaikan masalah ketika menguninstall Vmware yang tidak berhasil.

- 1. Pada window OS => Masuk pada Virtual Machine Library
- 2. Kemudian pastikan virtual Machine dalam keadaan OFF
- 3. Klik pada pilihan"delete"
- 4. Selanjutnya klik Move to Trash.

Apabila cara ini tidak berhasil saya akan memberikan pilihan kedua yang dilakukan adlah yakni melalui task manager..

Saya juga kurang begitu paham mengapa Software Vmware ini memiliki ke sensifitas yang tinggi,sehingga jika ada kesalahan sedikit saja akan terjadi EROR,

Dan saya akan membantu teman-teman yang susah menghilangkan file VMware dari laptop atau komputer teman teman.Karena apabila hal ini dibiarkan saja maka, akan mengakibatkan komputer teman menjadi LEEMOOOOOTTTTTT>

1. Hal pertama yang kita lakukan adalah meremove fsoftware vmware dari program unisntall kemudian kilik unisntall,mungkin cara ini teman 2 sudah mengerti tanpa saya jelaskan lebih panjang.

Ikatlah limu dengan menuliskannya

2.Ada suatu waktu software yang ada di dalam,program uninstal tersebut tidak dapat dihapus dan bahkan mengakibatkan komputer menjadi heng / bluescreeen.Maka yang akan kita lakukan selanjutnya adalah go tu the TASK MANAGER dengan cara ---->CTRL-ALT-DEL \*cari software vmware yang masih RUN kemudian klik end proses

pplications Proces	ses Services	Per	formance	Ne	tworking	User	s

"Dan pastika semua file vmware telah disable"

4.Langakh selanjutnya kita aka membersihkan file-file vmware yang masih tersembunyi masuk ke program alamat dibawah ini:

🌲 🕨 Computer 🕨	S3A934	30001 (C:) 🕨 Use	rs 🕨 Tosk	iiba ► AppData ►	Local + Temp +

4.Terkadang masih ada problem yang terjadi, yakni file vmware YANG ADA DI DEKSTOP tidak bisa hilang, tidak perlu khawatir yang harus dilakukan adalah ---->klik kanan open folder location---

Ikatlah limu dengan menuliskannya

kemudia hapus semua file vmwarenya (), mungkin akan banyak file yang akan dihapus seperti dibawahh ini:

SELAMATTT (^\_) SEMUA FILE VMWARE TELAH HILANG,

Apabila dengan cara manual file2 VMware tetap mengganggu maka SARAN saya adalah menginstal software REVO atau CLEANNER yaitu sebuah software unisntal yang senganja dibuat untuk mempermudah proses uninstal.

SEMOGA SEDIKIT ILMU INI DAPAT BERMANFAAT TERIMAKASIHH..

SELAMAT MENCOBA SEMOGA BERHASIL (\*-\*)

Terimaksih kepada pembaca yang telah meluangkan waktu untuk membaca artikel ini,saya mohon maaf apabila dalam saya menulis artikel ini terdapat kesalahan, karena sesungguhnya karena tidak ada gading yang tak retak, dan kesempurnaan itu hanya milik Allah SWT.

Nama saya Anis Dwi Jayanti. Saat ini saya masih menjalani kuliah saya di Politeknik Negeri Semarang program studi D3 Teknik Telekomunikasi.Selain menjalani kuliah saya juga aktif mengikuti Unit Kegiatan Mahasiswa (UKM) yakni, UKM Pengembangan Pengetahuan dan Rohis (Jazirah). Saya lahir di Boyolali, 13 Januari 1993. Saya pekerja keras dan pantang menyerah.
